

Hin'ni Muchan Umzuman

26a

Version 2

Trad.
Arr. Stuart Izon

The Arizal and his followers instituted the practice of adding "Hin'ni Muchan Umzuman" before many different mitzvot. This well-known, traditional melody is used each time, with the text changing to suit the mitzva. Examples include introductions to Friday night Kiddush, to Birkat Hamazon, to each of the four cups on Seder night, and of course to S'firat Haomer.

For whatever reason, some of these liturgical additions have found more popularity than others, and none more so than S'firat Haomer, to the point that for many, this melody seems to now be inextricably linked to the S'firat. This is somewhat ironic, as according to most commentators, the mitzva of counting the Omer is only considered to be a mitzva d'orayta while the Temple stands. Nevertheless, the custom to recite this paragraph before counting S'firat is extremely prevalent and this catchy melody has become an established minhag across the world.
