

Birchot Havdala

538a

Version 3

Debbie Friedman
Arr. Stuart Izon

Debbie Friedman's Havdala melody has become ubiquitous across the world, across every denomination of Judaism, to the extent that many people don't realise how modern it is or who wrote it. Often it is sung at a breakneck pace, but it is instructive to listen to Friedman's original recording which has a much slower tempo, to soothe and console us as we reenter the week from the spiritual highs of Shabbat.

Some also make a mistake in the melody over the word 'Haolam', which should descend not ascend (and may also play an incorrect chord here when accompanying). My observation is this error tends to be more prevalent amongst the Orthodox, who may have never listened to the original.

[illegible]
